⚠ Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Reduce server response time

In our test, your server responded in 0.82 seconds.

There are many factors that can slow down your server response time. Please read our recommendations to learn how you can monitor and measure where your server is spending the most time.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

Minify JavaScript for the following resources to reduce their size by 295B (22% reduction).

- Minifying https://www.innomatics.in/wp-content/themes/fundrize/assets/js/fitvids.js?ver=1.1.0 could save 174B (20% reduction) after compression.

- Minifying https://www.innomatics.in/wp-content/themes/fundrize/assets/js/matchmedia.js?ver=1.0.0 could save 121B (26% reduction) after compression.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Mobile

Your page has 5 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 18% of the final above-the-fold content could be rendered with the full HTML response.
