**62 / 100** Speed

 Should Fix:

### Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://netzseo.de/>
- <https://netzseo.de/>
- <https://www.netzseo.de/>

Eliminate render-blocking JavaScript and CSS in above-the-fold content

## Mobile

Your page has 2 blocking script resources. This causes a delay in rendering your page.

Approximately 7% of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

- <https://www.netzseo.de/js/jquery-3.2.1.min.js>
- <https://www.netzseo.de/js/responsee.js>

## Consider Fixing:

### Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 29% of the final above-the-fold content could be rendered with the full HTML response.
- [Click to see the screenshot with only the HTML response: snapshot:2](#)

## 7 Passed Rules

### Enable compression

You have compression enabled. Learn more about [enabling compression](#).

# Mobile

## Leverage browser caching

You have enabled browser caching. Learn more about [browser caching recommendations](#).

## Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

## Minify CSS

Your CSS is minified. Learn more about [minifying CSS](#).

## Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

## Minify JavaScript

Your JavaScript content is minified. Learn more about [minifying JavaScript](#).

## Optimize images

Your images are optimized. Learn more about [optimizing images](#).

**100 / 100** User Experience

 5 Passed Rules

## Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many

## Mobile

platforms. Learn more about the importance of [avoiding plugins](#).

### Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

### Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

### Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).

### Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).
